**ZOOM**CACHE

Makes your website go
FASTER.

Websites that load faster result in higher conversion rates and higher customer satisfaction. ZoomCache is the easiest way to get your website loading faster **without** building a new website from scratch.

THE ONLY AUSTRALIA-FIRST CONTENT DISTRIBUTION NETWORK

WHAT DOES ZOOMCACHE DO?

YOUR WEBSITE
LOADS FASTER

A slow loading website is a customers nightmare.
You can't afford to miss out on sales due to a slow loading website. Customers demand sub-3-second load times.

BRING YOUR WEBSITE
CLOSER TO YOUR VIEWERS

Latency matters. Average ping time from Australia to the USA is 250ms. Versus 20ms within Australia. Bringing your website closer to your customers increases performance.
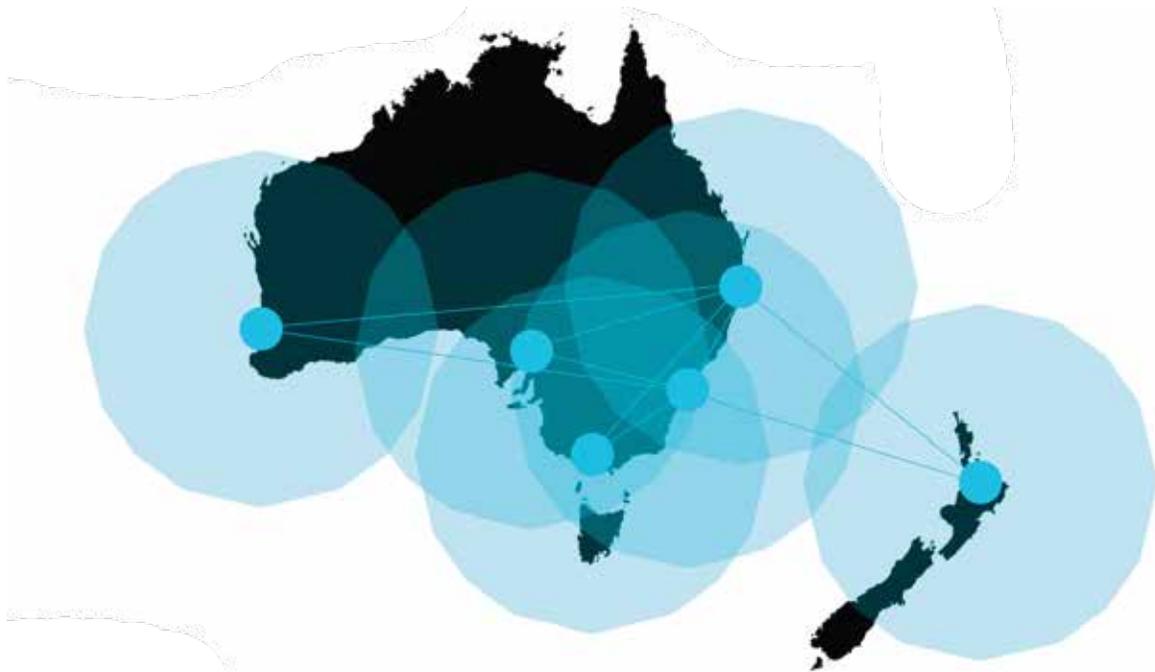

PROTECTS AGAINST
MALICIOUS ATTACKS

Your websites source code and database becomes invisible to the Internet. ZoomCache acts as a bouncer to your website, tossing the bums and waving in the valued customers.
Our intelligent traffic management system automatically routes visitors to the closest available node, and boots the bad guys.
YOUR WEBSITE
DISTRIBUTED.

ZoomCache

Microsoft Azure

Google Cloud

Amazon Web Services

*Test performed in Brisbane as a latency test comparing Australian edge nodes from third-party providers with ZoomCache closest edge node. Graph is representative of the results captured in milliseconds.
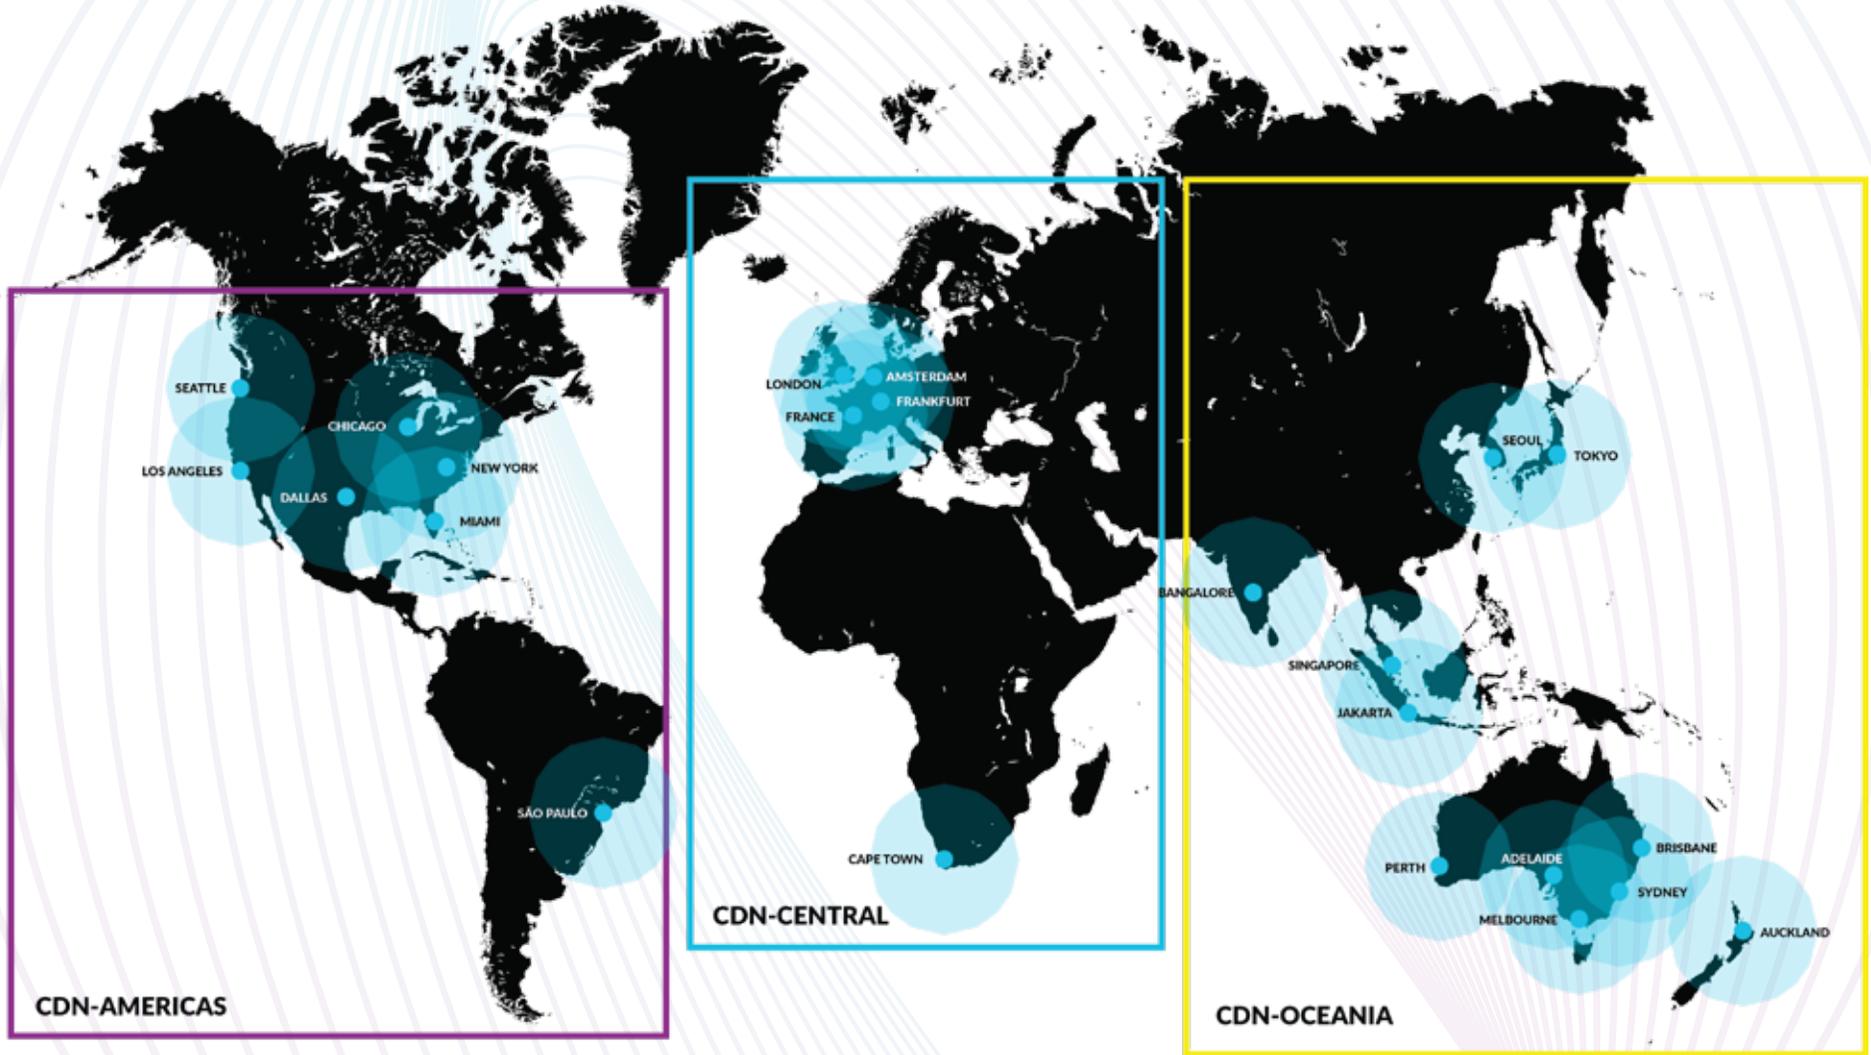

Up to 8x Faster than other global content distribution networks

Hosting from a single location can be risky, sudden spikes in traffic can bring down your website world-wide.

GLOBAL FOOTPRINT

MASTER PLAN.

Currently 24 Edge locations. Our network is expanding. New nodes are being created every month. All to deliver the speed and performance your customers demand.

Our Church recently had a website crash due to COVID-19 and many more people than normal logging onto our website at the same time. We needed a quick solution, but did not have a high budget to spend to upgrade our bandwidth. After talking to Iain from Momentum Hosting, who was incredibly helpful and efficient, he recommended we try ZoomCache.

We found it very reasonable for our budget but also it solved the problem immediately. Since then, we ran another online service and our website handled the amount of people easily. We are very grateful for Iain and would recommend his company and ZoomCache software!

The statistics speak for themselves.
